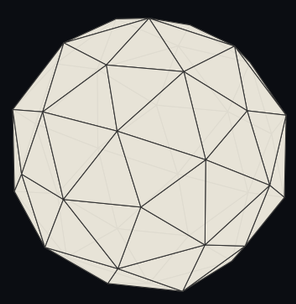
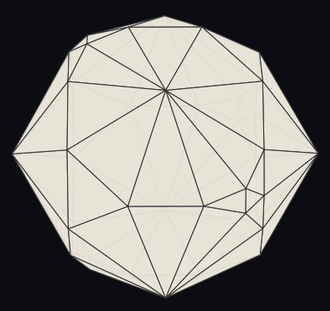
Naming shortlist: standout slices of the White Queen (W) and the Red Queen (R)
placeholder names; codes = rows of the appendix tables of #63 v3 and #65 v2

W1 Lion



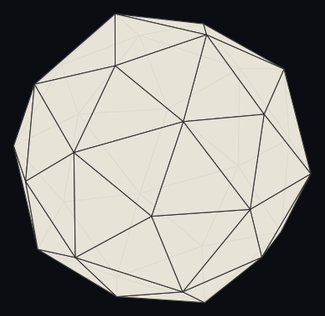
the central slice, vertex-first; 42 corners, 80 triangles; twin counts with W58

W58 Unicorn



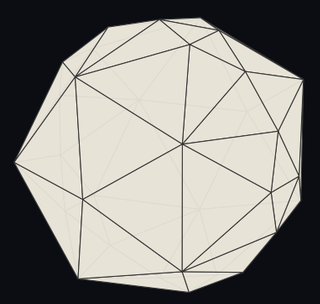
cell-first; 42 corners, 80 triangles; same counts as the Lion; congruence not yet checked

W5 Tweedledum



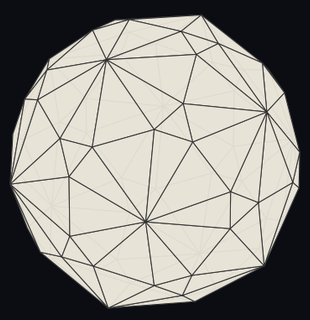
vertex-first; 32 corners, 60 triangles; twin counts with W22

W22 Tweedledee



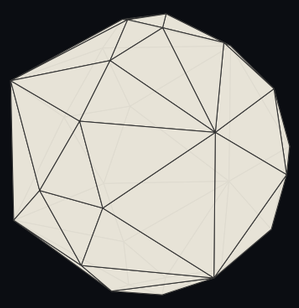
edge-first; 32 corners, 60 triangles

W3 Jabberwock



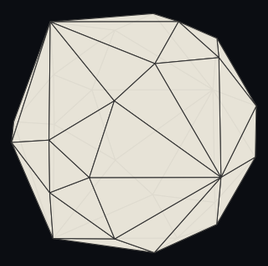
vertex-first; 72 corners, 140 triangles: the largest all-triangle slice

W43 Jubjub



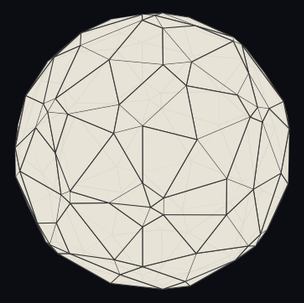
face-first; 30 corners, 56 triangles

W60 Bandersnatch



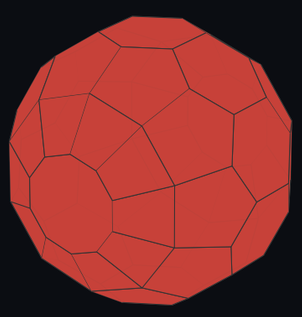
cell-first; 28 corners, 52 triangles

W49 (hold)



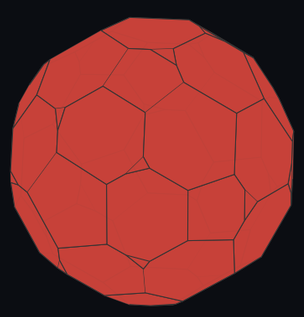
cell-first; 144 corners, the largest slices: W28, W30, W49, W51 share 144 corners and 218 faces; congruence to check before naming

R77 Red King



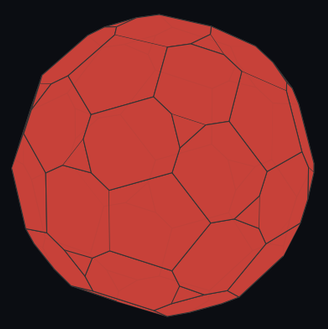
pentagon-first central slice; 80 corners; two regular decagons; the polar of the White Queen's edge-first shadow

R80 Walrus



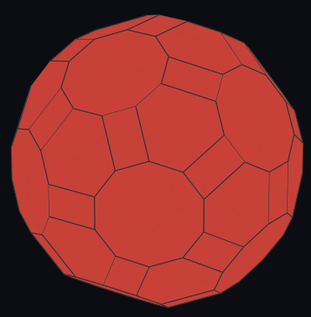
pentagon-first; 120 corners, 62 faces of 3, 5, 6, 7 and 8 sides

R113 Red Knight



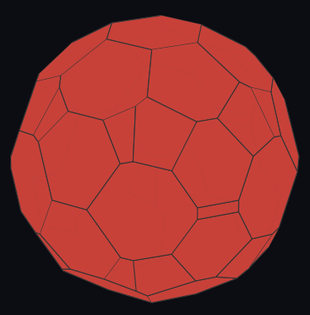
cell-first; 120 corners; 20 triangles, 12 pentagons, 30 octagons

R115 White Knight



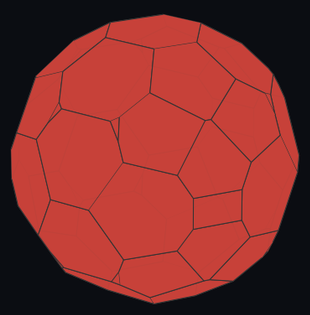
cell-first; 120 corners; 30 squares, 20 hexagons, 12 decagons

R33 Haigha



edge-first; 114 corners; the only slice with nine-sided faces (six of them)

R35 Hatta



edge-first; 114 corners; the other 114-corner slice; faces of 3, 4, 6, 7 and 8 sides
