Telescope, part 1: cap A with inner flaps

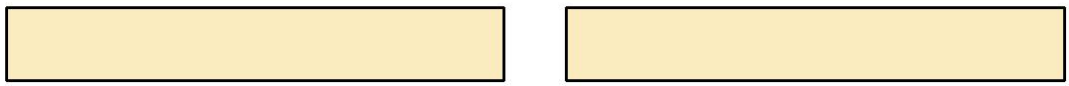

Cut, fold the dashed lines, glue the six pentagons into a cap. The 10 flaps stay open: they slide INSIDE the
Red lines on the flaps: where the ring’s edge sits for the LONG shape.
Edge = 2.7 cm on all three sheets.

Telescope, part 2: the middle ring and two slider loops

Join the two rows into one ring: each row’s end tab goes under the other row’s first face.
Red line: where cap B’s flap edges sit for the LONG shape.
Slider loops: wrap each round the ring and a cap-B flap on two opposite faces; glue the loop to itself only.
Edge = 2.7 cm on all three sheets.

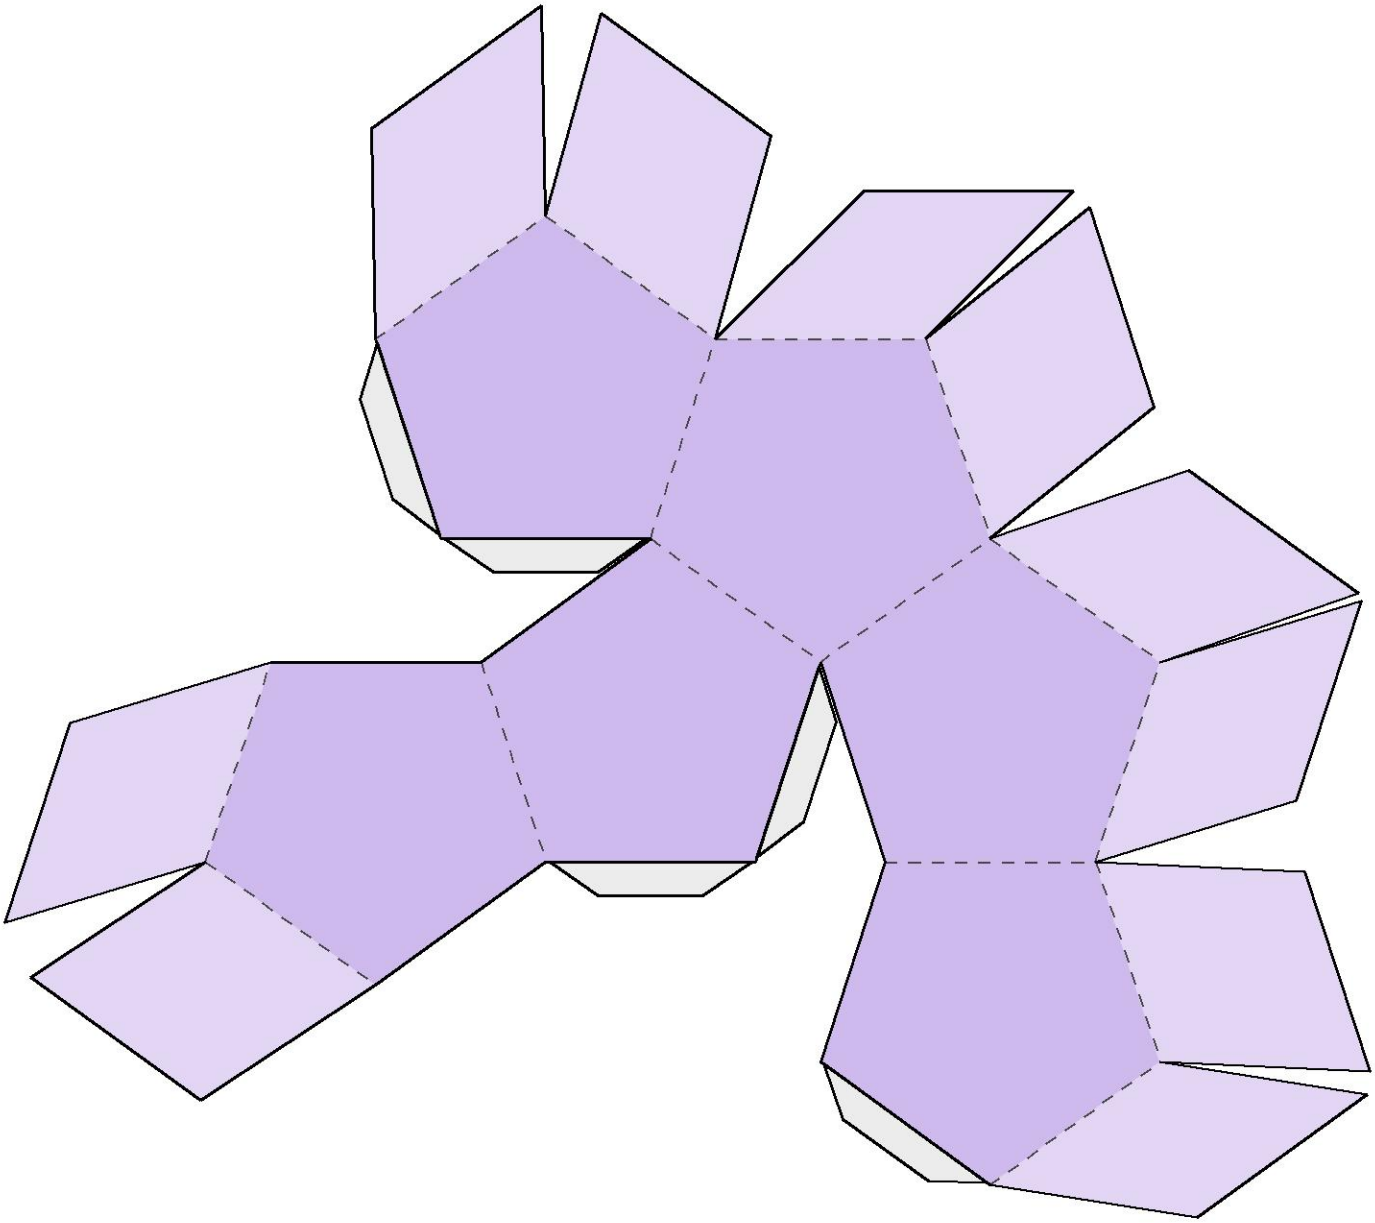

Telescope, part 3: cap B with outer flaps

Cut, fold, glue the six pentagons into a cap. Its 10 flaps slide OVER the ring.
Short: push everything together (all layers overlap). Long: line up both red marks.
Edge = 2.7 cm on all three sheets.
