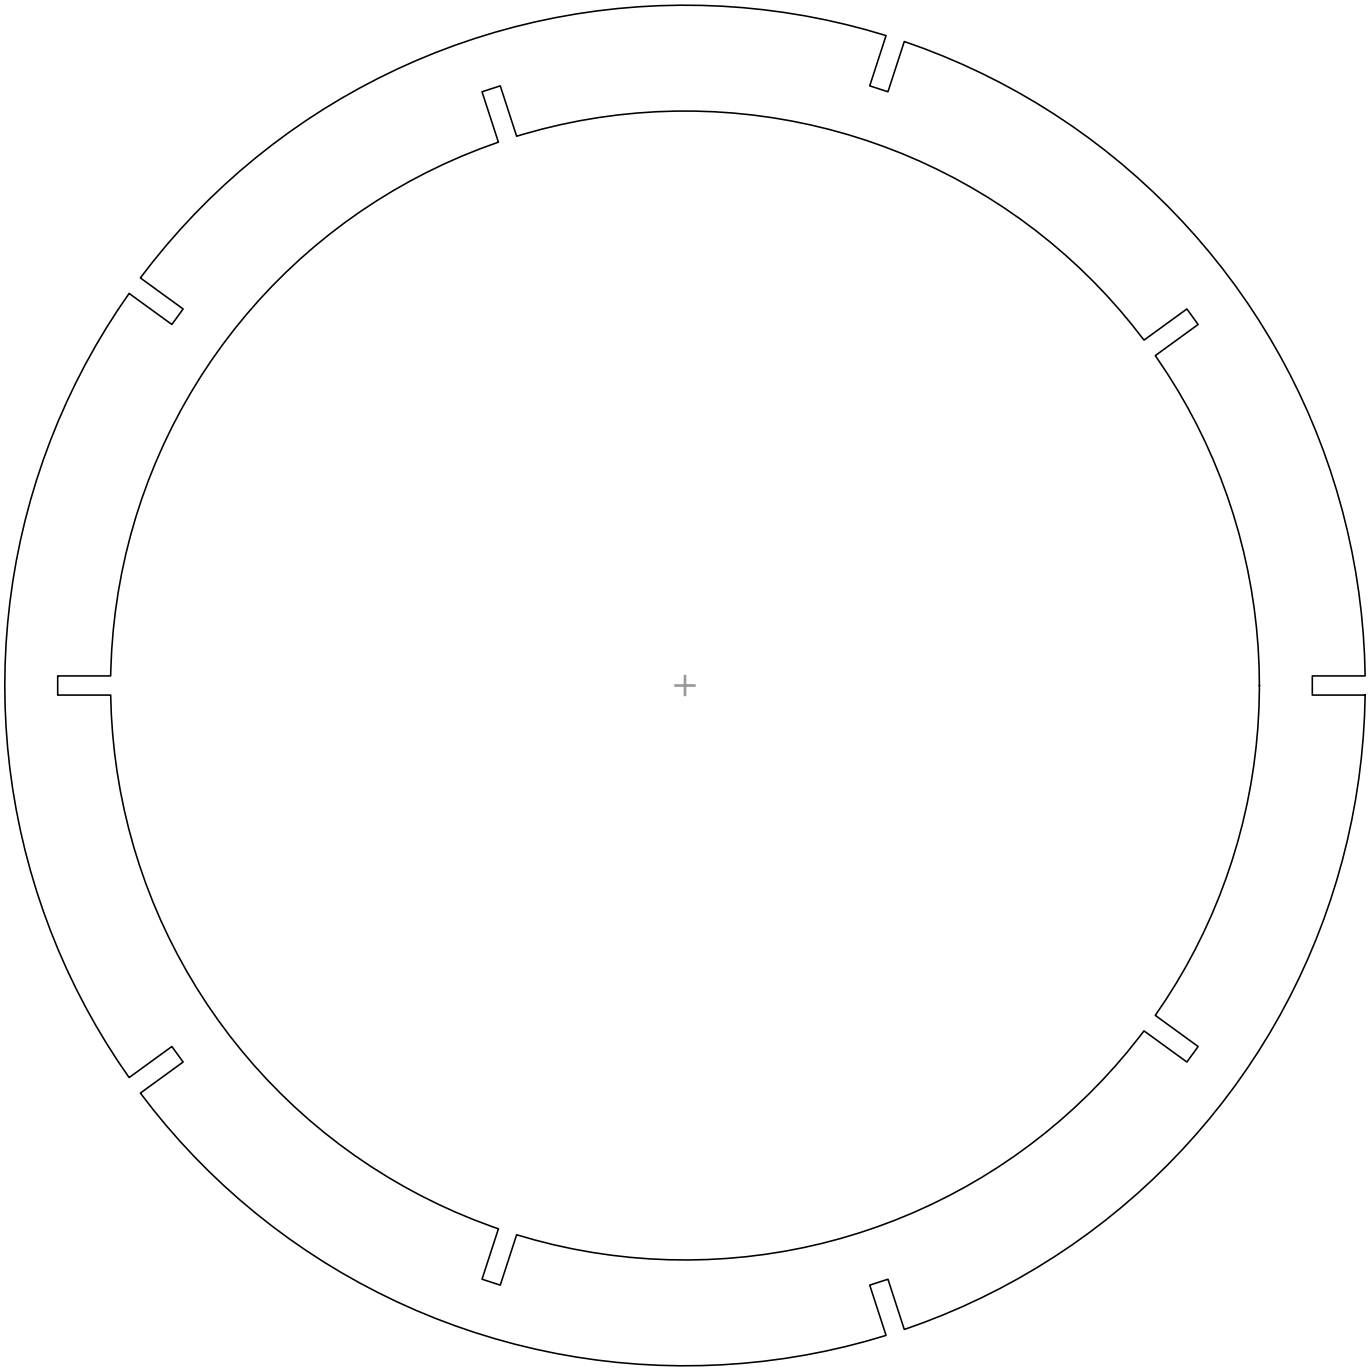
Six slotted rings: cut 6

Outer diameter 180 mm, band 14 mm, for sheet 2 mm thick. Slots 2.54 mm wide, 7 mm deep, every 36°, alternately from the outside and the inside. Slot each ring onto the others, outside slot into inside slot; the planes cross at 63.4°, so card or thin PET sheet will flex enough to close the last rings.



check: this line is 100 mm
